

# Horizon Scanning

The Horizon Scanning bulletins support the commissioning process and service redesign, bringing together new and emerging information on:

- **best practice**
- **innovation**
- **future risk factors**

Service commissioners and service provision managers will find the bulletins indispensable.

The service provides an easily digestible monthly email update of key and relevant information and examples of new or developing services in other NHS organisations, and transferable examples from other sectors.

The bulletins are quality-assured by experts in the field to ensure high quality information.
